Virtual.Kt.So.Uncensored,jf0xIQ: How can I instantiate a Singleton class that implements an interface in Spring? I'm trying to use Spring to instantiate a class that implements an interface and I'm struggling with how to get the Spring context to assign values to the class's variables. I have an interface: public interface MyInterface { public void action(); } And a concrete class: public class MyClass implements MyInterface { int myVar; public MyClass(int v){ myVar = v; } @Override public void action(){ System.out.println(myVar); } } And I'm trying to instantiate it using this code: @Component public class MyClassLoader { @Autowired private MyInterface myInterface; public void setMyInterface(MyInterface myInterface){ this.myInterface = myInterface; } public void create(String url){ System.out.println(myInterface); MyClass myClass = this.myInterface.getClass(); } public void destroy(){ this.myInterface = null; } } When I create an instance of it, I get: java.lang.NullPointerException at com.my.MyClassLoader.create(MyClassLoader.java:54) at com.my.MyClassLoader.3e33713323
