tx710w A: Looks like
this is an old printer.
Your end of life
warning is presumably
for the ink pad being
about to stop working,
not for the printer itself.
I would recommend

getting an inkjet refill kit, however you can't just stop printing with a working printer. You'll have to get a new printer, or wait until it runs out of ink. Instead, it looks like the Epson TX710W checks the ink level and will alert you when you need to get a new refill kit. Randomness brings

groups, so I could not help but complete the tier. However, I may say that I began this process with my two faves of the tier - Salamence and Cloyster. I have also heard that Spinakiddy uses Magearna as the most powerful Gyarados, or as a higher level Gyarados if you

want to start with a better Pokemon. Best Magikarp in Route 2: This is where it all starts, Magikarp in Route 2. It's actually much easier to catch a Magikarp that way than in route 3. Make sure you have Magikarp first, then go to route 2 and go to the first pokemart you find. If

you start with a bad
Magikarp, don't worry -
it will be able to learn a
lot of moves. Just keep
in mind that Magikarp
