Lies, deceit, squandered talent and twisted dreams are all that define the life of a man who can no longer see the light at the end of the day. It's the callous turmoil of a seemingly unending landscape of days, in between bouts of cosmic catastrophes that have left the man a ruined shell, broken with incurable wounds that no surgeon could heal. Day in and day out, this man labors to create work that is worthy of his name. But in reality, it's just another part of a work that never stops, a work that is of no interest to the man and his family. At the heart of it all are monstrous women. He cannot remember which came first, his loneliness or his longing for these women. However, they, with their alluring and mesmerizing fragrances, and their unnatural minds, grasp him. Each one is capable of blinding his intellect, draining his limbs and rendering him more and more passive. The man's burden is too heavy and he is in dire need of a respite, and perhaps a sense of pure purpose. Who said that you have to have a job when you want to have one? Hardwork Simulator is the life simulator for those who'd rather be free. It's a game that thrives on your own desires and the unique atmosphere that only you can create. You'll need to carefully plan the paths of your emails and letters, whilst dealing with the potentially-insane prospect of being unable to store and recall your work later on. Also, you need to stay on the right side of your computer screen; it's less that this work is a chore and more that you need to keep an eye on the letters falling and shifting in the air. Should they enter your keyboard, that would be a major disaster and you would have to start all over. Failure to pay attention to your surroundings could possibly land you in the hospital or even in jail; a sentence that would last for many years. Best of luck! Features: - six stages of work - a mobile game - a proof of concept downloadable alpha - 20 solid hours of gameplay (possible to complete, if you're up to it) - multiple endings - 20 real characters from all over the world - light and dark tones - 50 unique items - different bosses - a game soundtrack - a written text in English

This musical project is done by a group of musicians who love old video games, classical music and film score. Using information from both games and film, the group is creating music inspired by the 90s and early 2000s genres that had a large influence on the old RPGs. Cave Story is a great inspiration to the group. The nostalgic and nostalgic feel of the game is especially driving force behind this project. Using a limited number of effects, these unique sound sets are reminiscent of the 90s tech, and designed to fit even in an early game of that era. "Musical flavors of life" is the group's motto. This project hopes to be the soundtrack for the long journey of the ordinary - life, work, friendship, love. The tempo can change freely from in-game to out-of-game. This soundtrack consists of your typical music, plus two other theme songs that will move through the scene the story is developing. Enjoy your meal of music with a variety of emotions. ■Titles 1. Brown Forest Elementary, 9:00 AM Theresa - Beth - Prince Philip - Princess Rose - Princess Miranda ----- "Here's a good example! These students are going to make a big mistake! They should be sitting still right now..." The teacher's voice was muffled by a big wad of crumpled paper stuffed in his mouth and tied around his eyes. The students could not see the purpose of the teacher's gestures, and they were quick to mimic his movements. A tiny red-headed girl in the back row was pouting as her legs floated off the bench. The teacher wasn't paying attention to her, and that was just fine with her. "But it's so much fun!" Another little girl, with black hair and pale skin, was getting her rear kicked. The boy sitting beside her was trying to catch the girl's schoolbag, so the kid sitting next to the girl could get at the bag without getting caught. The little boy's face was bright red, and his knuckles were white from the effort of holding back his laughter. The girl shook her head at him, and he raised his eyebrows, and then they both turned and stared at the teacher. The teacher let the paper wad slip from his mouth, and a tiny parade of colorful confetti flew over the heads of the kids. The paper fluttered to the floor, and it was then that the teacher spotted the classroom "freaks." One big boy near the center of the room was stuffed, head-first, into a swimming pool. A large red hat was covering his head, and a silver number 8 was sticking out from his neck, like a dog tag. The boy was sinking as his head went deeper and deeper into the pool. He tried to swim out, but he was stuck. The teacher gasped when he saw the freaks, and then he called a recess. As a class, the freaks drifted towards the door, and the other kids followed suit. The lady in the red hat was still caught in the water. She tried to shake off the boy who had caught her, but he just laughed. He stuck his tongue out, and his ears flapped like a flag, just before he took her by the hand and pulled her out of the pool. She shook off the water and then wrapped the boy in her arms. He giggled, and she kissed him on the cheek. A few of the boys in the group were still talking, and others just stared

Guide Missed our Mythic Legions Tactics guide? Here's a quick teaser: this guide will be a tutorial to teach you how to play the game of Mythic Legions, such as which heroes to build. Not everything is a must-have; it's just a guideline. All other builds are for entertainment purposes only. Build 10 (standard) — Build 10 As discussed in my previous Mythic Legions Tactics Guide, the 10-core heroes (or 10 core heroes in Rush) are very powerful in the current meta game. Their effect is bigger than an 8-core as our loss ratios are too small to justify spending lot of resources on reactive cores. In this tactic, we only go for 3 cores. Note: I feel a bit sad that I haven't done a build guide for 10 cores for a long time, my record is now "broken". But we don't need to rush now if any new "shadow core" will break it. **Advanced Alchemists** We are going to play with both the classic camp using heroes and the new shadows heroes alike. **Unmasked: 100 / 100 / 0** The stats for the last Unmasked are made for a performance loss but to make up for the loss, the Unmasked is 30% cheaper to make and it applies the bleed effect every attack which makes it a real monster. **10* Jagermeister** : The 10% stamina discount is too good to pass up for Alchemists. It gives them really good flexibility in lane (enough for buffs, heals, waves and strong pushes). Jagermeister is also good for a core (can act as a mana core) but the 10% discount is far above any other core. **Cost: 9 Unmasked every 2 Unmasked** also gives a considerable bonus to building rate for the Jagermeister as it's 10% cheaper. For example, if you have 2 heroes on the board (1 to camp and 1 for missing pushing) and 1 more is around the 15-20% discount window, you can simply build 2 more Unmasked and get a 50% discount while the remaining Unmasked is still applying the bleed effect. **10* Onyxia** : 5% adrenaline and 5% morale gives a really nice impact to a hero who can't really push. Our bleed effect will

You can now see the entire P-31 series from the point of view of the Academy. With Gigantus and its talents, the Stray Quartet will be the ones to greet the Phantom Thief. Will the fore-front of the Phantom Thief Guild be disturbed? Unfortunately, there are only four...Q: Saving data after updating it using peewee ORM How do I need to save data after updating it? I've an object and I want to update the entire record and save it. How do I do that? I've a model class User with following fields. class User(BaseModel): username = CharField() password = CharField() email = EmailField() gender = CharField() I've created an instance and update it with gender='male' like below. user = User(username='test', password='pass', email='test@email.com', gender='male') user.gender = 'male' user.save() The above code returns an error. ERROR SQLERror("Must specify gender") Thanks in advance. A: In your example, gender must be a CharField and you're passing a string, so you must also pass a value for that field: user.gender = 'male' user.save()
