Gallery About us We as a team are a bunch of compulsive gamers who like to focus on team work and F2P. At Duty Ace we strongly believe that T9 should be in all of our Q: Remove double quotes from a string in an XML document with XSLT I need to remove double quotes from some XML document. I've got the following in XSLT: but I get " I've tried several different ways to get rid of the quotes, but I'm just stuck with the result above. Any advice? A: Can't you just write: Breaking: Walter Johnson Died Wednesday Night Walter Johnson, a 6-foot-4, 240-pound former Kentucky standout who went on to be a star quarterback at Miami (Fla.) and became a first-round draft pick, died Wednesday night at age 42. He had been in intensive care at a local hospital since he collapsed early this month at a nightclub in Miami. He had been suffering from liver disease. Johnson played two seasons at Kentucky, but he was not selected in the 1987 NFL Draft. The Miami Dolphins picked him in the second round of the 1987 supplemental draft. He helped Miami reach the Super Bowl in 1987, but the team lost to the Los Angeles Raiders.About the author Gleb Tsipursky is a computer science researcher at the National Institutes of Health. To the casual observer, this could be dismissed as a boring, old problem. But in fact it is both fascinating and important, and it has an unexpected connection to the development of new wireless networks. Over the years, several researchers have tried to characterize the network of edges in a wireless mesh network. The idea is that each node in the network can see its surroundings, and based on those views, each node can decide which other nodes to connect to. As a result, the network converges
