This is the latest version of vpnify, your one and only
true vpn app, install it now and enjoy your vpn
unlocked, secure and ad free internet, make sure
you always have safe vpn and wi-fi access even if
your mobile is locked, download now to keep safe
from hackers and low idle devices. In this video,
you'll learn how to build your own VPN with
OpenVPN using our highly recommended Terminal
emulator (TeraTerm, PuTTY) and Vpnc. When
you're all done, you'll be able to secure your
VPN connections on any computer, anywhere. Get
cracking! Let's go over the parts you'll need:
- One Ethernet Cable for the server. - One Ethernet
Cable for your PC. - One Ethernet Cable for your
router. - One USB stick (USB 3.0 or later). - The
OpenVPN software (download here). - The detailed
source code. I'm assuming that you've
already gotten OpenVPN setup on your PC (check
out this video to learn how: Here's what you
need to do to get your OpenVPN server up and
running: 1. Install TeraTerm on your PC and connect
it to your modem's IP
