Custom message here Where I placed the above script in my server, inside the.php file it loads the CMS page content. EDIT:: ANSWER :: I placed my content with echo and its working perfectly. Problem was I was writing echo in the wrong way. A: you need to print the \$content variable ' ', \$output['title'], ' ', ' ', \$output['description'], ' ', ' ', \$output['date'], ' ', ' ', \$output['author'], ' ', 'Download', ' ', \$output['url'], ' '; echo \$content; ?> While printing php variables is not natively supported in the Yii framework, what you did is to actually create a nested array containing the variables, and print that array, which just gives the output of the whole array, Q: Using javascript to redirect to the same page, but keep the new window open I'm trying to open a new window using JavaScript (for a pop-up window). Then, I'd like to redirect the page to the same domain, but with a new window being opened. I'm looking for a way to close the old pop-up and not lose the HTML. The idea is that if the user does not click 'OK' on the pop-up, the content of the pop-up will be kept in the new window. Is there a way to open the new window and have JavaScript redirect back to the same page, but have the new window still open?

Losriosdecolorpurpura2audiolatino losriosdecolorpurpura2audiolatinoQ: When is a function of several variables a function of one variable? I am stuck with this problem. I have a function $g(x,y)$, which depends on two variables, say x and y . Could g be a function of x alone, i.e. $g(x)$? Is the answer yes? If so, could you please explain in detail? How about $g(x+h)$, where $x,h \in \mathbb{R}$? A: In the special case $x=0$ and $y=0$, then $g(x,y)$ can be expressed solely as a function of x , and if so g is said to be a function of one variable. Too sweet? Are children's food preferences influenced by the type of milk they drink? The study aim was to investigate the relationship between the type of milk children drink and their preferences for sweet and savoury foods. Data from 3- to 5-year-old children ($N = 356$) and their mothers who were participating in the well-being study, were used. Children's liking for sweet and savoury foods were measured by an ad libitum food tasting. Children's preferred milk type was obtained by a milk-drinking questionnaire completed by their mother. Children drank milk alone significantly more often than with water (p 1. Field of the Invention The present invention relates to a process for forming metal oxide films. More particularly, the 6d1f23a050
