DownIQ: A question about a vector field over a closed orientable 3-manifold Let M be a closed orientable 3-manifold, and τ a spin^c -structure on M . As we know, $[\tau] \in H^2(M; \mathbb{Z})/2\mathbb{Z}$, so M admits a one parameter family of metrics. From the argument of Theorem 6.7.2 in Schulten-Seidelmann, we know that there is a unique vector field X such that the Morse function on $\pi_1(M)$ induced by the Morse-Smale condition is the restriction of the function f_X , and the one parameter family of metrics on M is given by rescaling the metrics induced by X and the Cerf-Wallach's completion map $CW(M)$ to $\overline{CW(M)}$. We claim that the vector field X satisfies all the conditions below (in the following I just give the conditions of the existence, for the non-existence part of the proof I am still waiting for the proof). (1) X is complete and Killing, (2) X is tangent to the orbits of τ , (3) X is essential in M , i.e., it doesn't have isolated zeros. To understand the definition of essential vector field, in Schulten-Seidelmann one uses the conditions (1) and (2)

"There is a huge void in the market of male-specific grooming products. The male grooming space is very lacklustre and the men out there are really missing out," said Paul Collins, founder of The Groom Box. "I wanted to fill

this gap and develop a brand that excited me as well as the men I know. Men are so busy and work and play so often side by side and even sleep in the same bed, so why shouldn't they have their own grooming products?"

Q: Counting by unique IDs and grouping by dates I have a table that stores "block chain" information where each user that is subscribed to my app gets a unique and recorded ID. Each user can view the

state of each of their blocks at any given time. The table looks something like this:

block_id | state | user_id

```
----- 1 |
2 | 36 2 | 1 | 678 3 | 0 | 76 4 |
2 | 31 5 | 0 | 36
```

I'd like to be able to count the number of times a user is subscribed and report that to a given date range on my website.

For example, 6d1f23a050
